

Research and development

Since our consulting firm is a service provider, we are not engaged in any research or development in the classic sense. We also make other resources available, for example to develop our own software or refine acquired software. In the financial year 2019, this took place particularly in the area of consultancy applications. The FERI Cognitive Finance Institute also operates as a strategic research centre and creative think tank within the FERI Group, with a clear focus on long-term aspects of economic and capital market research, as well as asset protection. In addition, the DOMCURA Group has also been active for years in the development of new products.
